"The Cohens and Kellys in Atlantic City."

Another red letter day for people who want to laugh--The world's funniest comedy team--Cohen & Kelly with their wives and the little Cohens and the smaller Kellys disputing themselves in the riotous, colorful playground of the world--Atlantic City. Gorgeous bathing beauties and laughs, laughs, laughs--new gags and side-splitting comedy situations to rock the world with laughter.

Institute Members Enjoy Meeting

The Champion Women's Institute met on Tuesday, the 13th at the home of Mrs. McDougall. It was decided to drop the flower and vegetable show on account of the continued dry weather. More arrangements were made about the baby clinic to be held on October 1st, and votes of thanks were tendered all the kind friends who assisted the Institute to put on the Champion County exhibit at the Carmangay fair.

After the business session there was a delightful program. Miss Gladys Rhodes charmed everyone with a violin solo, she was accompanied by Miss Barbara Wise, who played so nicely for us last time. After prolonged applause the girls gave us a fine encore; then Miss McDougall read "TOWER Shall be Tied To-night," which had everyone in gales of glee, especially those who used to recite "Curfew Shall Not Ring To-night."

Mrs. Ulrich, who was in charge of the program, then had two contests, the first was about "Tea" and three ladies came out even and cut for the prize. Mrs. Alexander got it then, and Mrs. Mifflin got the consolation, a can of fish. In the next contest, about different "Nations," Miss Rhodes won first, a nice little blue engagement book. Mrs. U. G. Anderson got the consolation, a nice box of Pep.

The usual good lunch was served by Messrs. Anderson, Watkins and McDougall, and then we had ice cream.

Bad Hail Storm Visits Lomond Dist.

The violent storm of Saturday evening which struck our town with the force of a cyclone did very little damage. It, however, carried its fury farther east, terminating in one of the worst and most extensive hail storms ever recorded in Western Canada. In consequence of this storm not a binder will burn for twenty miles or more east of Midway, Badger Lake and Wheat Centre, or say for a distance of twenty miles on each side of the Bow River--Lomond Press.

Cohen and Kelly thought that girls bought bathing suits to swim in--until they saw the beauties on the beach at Atlantic City--Champion Theatre August 22-24.

J. A. Ruggles of the Guess ranch delivered a 1,500 bushel carload of spring wheat at the Travers elevators during the past week. The grade received was No. 2.

Mr. and Mrs. W. McCumber have returned to Champion and will take charge of the Fisher home during Mrs. Fisher's absence.

Mrs. Irving Fisher accompanied R. I. Starr and wife on a visit to Mr. and Mrs. Frank Starr in California.

The largest party to visit the Lethbridge Auto Camp from Champion consisted of twelve visitors with R. A. Clements in charge. The trip was made last week.

Mrs. J. T. Stephenson was hostess to a number of young girls on Wednesday evening. Games, contests and music were indulged in to general satisfaction.

Old-Fashioned Tea Highly Successful

On Wednesday, August 7th, Mrs. L. M. Groves entertained eleven young ladies from the surrounding country and Lethbridge. The entertainment was an old fashioned tea served in old fashioned style, table decorated in blue with old fashioned blue dishes. The girls were dressed in old fashioned style some wearing their mother's and grandmother's dresses. They were certainly well attired in costume and it was difficult to decide on the 1st prize. Miss Dorothy Peterson of Lethbridge took 1st prize and Miss Rhea Higgins 2nd prize for best costume. Rhea also took the prize in the pen hunt. Mrs. Higgins and Mrs. Wise assisted Mrs. Groves in serving, and with the refreshments a very pleasant afternoon was spent in music and games.

Grain Deliveries Increase Steadily

A steadily increasing stream of grain is moving into town every day and will reach much greater proportions in the next few days. The yields as far as can be ascertained are fully up to expectations and the quality of the grain is excellent. It has been difficult to secure accurate details as to yield per acre as in most instances the fields were only partly harvested.

Mrs. W. Ulrich entertained a number of young girls on Thursday afternoon.

Mc and Mrs. Cowell and Miss Kathleen Cowell spent the week end at Waterton Lakes.

M. G. Cleary is planting cherry trees on his farm adjoining Champion, the young trees coming from Brooks.

Dr. Heal has moved his office to the building next to the drug store, which has been recently fitted up for him.

Mr. and Mrs. G. Depue, Mr. and Mrs. C. E. Anderson and G. M. Campbell took in the performance of "The Singing Fool" at Lethbridge.

Rev. and Mrs. Hunt sang a duett at the evening service on Aug. 11 at Parkland, on the 25th anniversary of the first service held there.

W. Collison has secured an elevator at Durward, near Nanton, and with Mrs. Collison left for that point recently.

F. M. Watts of the Pool elevator shipped a car of fall wheat grown by Clarence Davis on Wednesday. It graded No. 2 A. R. W. and weighed 60 lbs. to the bushel.

M. F. Hamilton of the Pioneer elevator shipped a car of rye for Mr. Shoults during the week.

The Western Canada and the U. G. G. elevators have been in the hands of repair gangs during the week and will be in first class shape for the rush.

The families of G. F. Smith, F. Wise, L. M. Groves and W. A. Jones picnicked at Carmangay bridge on Sunday, making quite a family reunion. Mr. and Mrs. Jones leave shortly for their home in Los Angeles.

Brown McDonald was as usual a successful exhibitor in the stock classes at the Carmangay fair. His prize winnings and those of others from this district are held over until available.

NOTES AND COMMENT.

The new roads built late in the season require ready rain to permit of packing before they will be satisfactory for traffic.

Now the fairs are practically over and undivided attention may be given to harvesting operations. Both Lomond and Carmangay held unusually successful fairs.

Travellers are thick these days and the merchants are stocking up for the harvest season.

Up to date men have been fairly plentiful and almost every one looking for help has been able to secure it when wanted. It is quite possible the beginning of threshing will absorb everything in sight in the way of men.

Very hot weather with cool evenings and mornings continues. It is doubtful if this season will not make a record for protracted heat and drought.

Harvesting and preparations for threshing are under way in every direction. East of Lomond harvesting is completed over a very considerable area as the result of the big hail storm.

The handling of short crops with a light yield are handled successfully with the combine, where old methods might easily result in a loss.

The Graf zeppelin has again made history, the return trip to Germany established a new low record of time for the trip.

A letter received by the secretary of Harmony municipal district indicates that the construction of the secondary highway from Lethbridge to Aldersyde is under consideration as well as the route the road will take. Definite information as to the route will be available shortly. A secondary highway on the Lomond line is also being considered.

With reports of crop burned in prairie fires at several points it should hardly be necessary to repeat warnings with regard to being careful of fire in the harvest fields and elsewhere. Disastrous fires have occurred in several towns recently, and it requires rain to relieve the danger of the situation.

Wheat Pool Notes

Over 400 agents of Alberta Pool elevators were assembled in Calgary last week at a four days' convention and every phase of the Pool elevator business was fully discussed. H. W. Wood, Chairman of the Board of Directors of the Alberta Wheat Pool in his opening remarks strongly recommended that the agents would best serve the Pool's interests by dealing with the members with the ut-

most fairness. He pointed out that no one was in evidence under the Pool system of elevator operation for any to deal unfairly with any member. The Pool Elevator system is not operated for profit, Mr. Wood declared, but solely on the basis of service to the membership.

Following the cut-off on the 15th of July when the 1928-29 Pool was closed, the Alberta Wheat Pool is taking action against Pool members who failed to deliver during the year. The Pool contract calls for the delivery of all wheat raised by each Pool member within the boundaries of the Province and the stipulated penalty for infraction is 25 cents a bushel. While the great bulk of the members are loyal, there are some who have apparently overlooked their legal obligations, and the organization is taking energetic action against the latter. It is realized by the Pool that court action is undesirable but at the same time it is not fair to the bulk of the membership for a comparatively small number to act disloyally and flout their contracts.

R. D. Purdy announced at the convention of Pool elevator agents that the Alberta Wheat Pool now owns 435 elevators spread over the length and breadth of this province. This is an increase of approximately 85 over the number operated last year, and makes the Alberta Wheat Pool easily the largest elevator organization in Alberta. The Pool has now facilities to handle approximately 90 per cent of all Pool wheat.

The Alberta Wheat Pool will pay farm storage to Pool members who hold their wheat on their farms until Monday, December 2nd, the amount being 2 cents per bushel. This decision was recently arrived at by the directors of the organization. Last year the Pool paid farm storage on a different plan, 1 cent per bushel being paid on wheat held until Dec. 1st, and an additional 1 cent for wheat held on farms until March 1st.

The World Wheat Situation

At this time, the opening of the new wheat year, it is impossible to discuss with some assurance certain factors influencing the world supply of wheat, and the prospective volume of international trade in this commodity. The first item to be taken into account is the carryover of old wheat, which, as far as statistical records show (they are fairly complete in only a few of the many wheat-growing countries) seems to be about 150 million bushels higher than on August 1st, 1928. Most of this surplus is in the United States; the Canadian carryover is now estimated as about the same as last year, owing to the fact that farm stocks of merchantable quality have turned out to be probably 10 million bushels more than was estimated a month or two ago. Argentina and Australia are thought to have slightly larger supplies, and European stocks are also reported to be somewhat higher.

The increase in the world carryover this year is, however, completely overshadowed by the probability of a considerable reduction, possibly of 350 million bushels, in the supply from the 1929 crops. The unfavorable crop conditions in Canada are fully discussed in the preceding section of this Letter. The American crops, both of winter and spring wheat, have suffered severely during the last month or six weeks, and the total yield is

not expected to be more than 800 million bushels. India has a new crop this year of about sufficient proportions to meet her domestic needs, in contrast with the situation in 1928 when the yield was small and importations were necessary. Harvesting in one section of the Chinese wheat-growing area, the Yangtze valley, was recently completed, with disappointing results both as to yield and quality. The new crop in Japan is reported to be below that of last year. Conditions have been favorable for the major wheat-producing sections of Africa. It is regarded reasonably certain that France and Spain will have larger crops in 1929; the German and Italian harvests may be as good as last year, but the new crops in the Netherlands, Belgium and Great Britain will be smaller. In Eastern Europe the extent of damage resulting from severe winter weather is now fairly well known, and the Danubian countries are likely to have crops about 50 million bushels less than in 1928. Reports regarding the Russian situation are, as usual, conflicting. Droughty conditions in Argentina indicate some curtailment in wheat planting this year, and dry weather in Australia has also probably prevented any increase in that country. The critical time for the crops in Southern Hemisphere, however, is in September and October, and no definite pre-

dition of the yield is now possible.

International trade in wheat during the next twelve months can hardly be expected to be of such great volume as in the 1928-29 season. It has been estimated that world consumption increases at an average annual rate of 70,000,000 bushels, but it varies, upward or downward, by as much as 100,000,000 bushels, depending on numerous factors, including the supply of domestic grains and imported carryover in the large importing countries and the price at which the latter can buy foreign wheat. In the preceding season most European countries had large crops of wheat, and their imports would have been smaller than in the 1927-28 season had it not been that feed grain was in short supply, which caused an abnormal use of wheat for stock food. The feed grain situation is not likely to be as acute this year and, if this should be the case and the wheat harvest favorable, the import requirements of Western Europe would be smaller than those of the year just closed. Furthermore, the governments of Germany, France and Italy have recently imposed new regulations with the object of increasing the use of home-grown wheat. An outstanding feature of last year's trade was the abnormal quantity of wheat bought by the Orient, owing in part to the large supply of low grade wheat in Canada and the United States available at low prices. With smaller crops this year in North America and the Southern Hemisphere and a higher price level, the Oriental demand will probably be of normal proportions.

all these factors into consideration a total trade of from 800 million to 850 million bushels would seem a reasonable forecast.—Monthly Bank Letter.

Pull Your Discs with Three-Fuel Power

Built for tractor power, the one-way-disc pulled by a three-fuel Hart-Parr cuts to full width at any depth. You need not just *skim* your land, for Hart-Parr power enables you to set the plow down where it belongs and keep it there. Two and even three one-way-disc plows are common behind the larger Hart-Parrs. They pay their way. Hart-Parr is the one tractor that develops tremendous power from gasoline, kerosene or distillate. We are now showing the improved 1929 line equipped with three forward speeds to speed up hauling and field work. Hart-Parrs are built for small, medium or large farms. Come in and see them.

Culpable Negligence

It is becoming, to an ever increasing extent, one of the responsibilities of governmental authorities to protect people against themselves, not only for their own sake, but for the sake of others whom, in one way or another, the first named endanger. One of the latest developments in this direction is the proposal by the Canadian National Railways to have their authorities to lessen the possibility of accidents at level railway crossings. Such crossings are always dangerous, but with the advent of the motor car, and the speed mania of reckless drivers, the death and accident toll has mounted alarmingly.

In nearly one thousand accident cases reported to the Board of Inquiry for the last year, there was danger of loss of life or damage to property because of negligence at highway-railway level crossings. Of these accidents 369 were reported on the lines of the Canadian National system, and railway officials have carefully classified these. It was found that more than forty per cent of the accidents were caused by some form of downright negligence on the part of the motorists.

Of the total number of accidents, 220 were caused by drivers of vehicles, including drivers of racing cars which had been lowered; 23 were drivers ignored signals and drove right through gates; 26 cases where drivers passed right ahead under gates which were in process of being raised or lowered; seven cases of driving on to crossings opposite gate which had been lowered; five cases where drivers under the influence of liquor crashed into gates; while three accidents were due to pedestrians crossing the tracks.

In other words, all these accidents were the result of a wilful disregard of the means of protection provided by the railways. But in their laudable desire for speed motorists were responsible for a large number of accidents which were the outcome of what is classified as "inexplainable negligence." Some of the most incredible performances of carelessness and recklessness are listed as follows:

Fourty motorists drove into the sides of moving trains.

Thirty-eight drove into the sides of standing trains.

One driver parked on the railway lines while he had a sleep.

One tried to drive between two railway cars while switching. He was unsuccessful.

Twelve parked on or near the railway tracks—they met express trains.

One driver left his car on the tracks to search for something he had dropped on the road. When he returned there was nothing left of the car. One driver had to be buried in his car because he had eaten too much.

Even found too late that his brakes were not reliable.

This amazing record shows that not only are many accidents at crossings due to sheer negligence and in no way excusable, but they also serve to indicate the nature of the problem of "educating" drivers of motor cars guilty of such inexcuseable conduct. Warning signs and even physical barriers such as high level gates are no sure guarantee against accidents due to such carelessness.

There appears to be but two methods of putting an end to such accidents. One is to do away with level highway-crossings altogether by carrying highways either over or under the railway tracks. This is a highly expensive business, and is not possible in a country of such immense distances as ours. The other method is to have a speed limit and at points where traffic is exceptionally heavy, and to this the Federal Government through the Board of Railway Commissioners, working in co-operation with Provincial Governments and municipal authorities, has decided to bend its energies to the cost of obliterating these level crossings by distributing among them the severest of financial penalties.

The only solution is to ban all drivers from the roads and to make it an offence for anyone to drive a car unless he or she has such a license, and to immediately cancel the licence of any person found guilty of negligence, carelessness, and recklessness in handling a car. Such persons are a danger not only to themselves, but to the public at large, and in the public interest should be denied the right to drive such a potential engine of destruction on the public highways as the modern powerful motor car.

New Midget Auto

Will Be Sold Through Mail Order Houses For \$200

The New York Times says negotiations are under way for the large scale production of the new "baby" car which is to be sold through the mail order houses for \$200.

The car is the invention of James H. Martin, of Garden City, N.Y.

The feature of the car is that it has no axles in the usual sense of the word, each wheel being independently mounted in the reduced body. Rubber "aviator cord" is used in the

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lightbown, Milford, Ont., writes: "I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in the stomach. I purchased a bottle of

"The Extract" and before I had taken a single drop I was completely relieved, and have had no trouble since. I am now in New York, after spending six years in the famine-ridden Ruanda district of Africa.

"I took Lydia E. Pinkham's Vegetable Compound for a month and found it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite.

"I am now in New York, after spending six years in the famine-ridden Ruanda district of Africa.

"It is pleasant to take and acts very quickly.

"My health has had the same experience as I had it."

"Dr. Fowler's" has been on the market for the past year, you don't expect to when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1796

Receives New Honor

King George Confers Barony on Sir Robert Baden-Powell

King George has conferred a barony on Sir Robert Baden-Powell, entitling him to sit in the House of Lords.

Lieutenant-General Sir Robert Baden-Powell founded the organization of Boy Scouts and Girl Guides in 1908, after he had had a distinguished military career in India, Afghanistan and South Africa. He received various citations and decorations for his war services, and others came to him for his work with the Boy Scouts.

NERVE TORTURES

A Condition From Which Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a nervous condition. This is unfortunate, but little sympathy is shown for the sufferer, from the fact that it is not possible to be controlled.

Men and women with nerves out of gear often become irritable and nervous, and when this is not their fault, their poor health is the cause.

The tired, household cares have worn her thin, the breadwinners whose anxieties are many, and the old who are ill, are among the nerve sufferers who become run down. These nerves, which are the life of the body, are easily strained and overtaxed.

In all such cases the best and simplest treatment is a course of Dr. Wm. H. Wood's "Felt Tired and Miserable" Liniment. Dr. Wood, once, tells how this medicine ended her nervous troubles. She had been a nervous sufferer from youth and dizzy spells, and the hundred and one things which in her life caused her to be nervous. The first thing I found to help me was Dr. William Pink Pills. Under their influence I began to feel better, the blood and brain were well supplied, the nervous system and brings good health and strength. I have been taking Dr. Wood's Liniment ever since, and the dizzy spells have less frequently, and I became stronger and stronger. I have used the pills for some time and found that they enrich the blood, build up the body, and give me medicine for both old and young.

You can get these pills through any druggist, and by mail, in a box from The Dr. Wm. H. Wood Company, Brockville, Ont.

WORLD HAPPENINGS BRIEFLY TOLD

Two Canadian girls, each 15 years of age, led the 1,600 candidates graduating Bachelorors in letters from the Sorbonne, Paris, France, that has been announced.

An amateur astronomer, named Forbes, at Rutherford, has discovered a new comet. Protection taken, it is reported, confirms its presence.

Karl Auer, Frieherr von Welsbach, inventor of the incandescent gas mantle, died recently at his residence at Weissen Castle, in Cattinaria, Austria, after an attack of Austria lamps and sunburn.

The recently proposed night from Saskatoon to London, England, by the northern roads, is being postponed until next year, according to Bert Blotman, the venture, who is organizer of the venture.

The Prince of Wales received Lieut.-Col. R. M. Blair, Commanding Officer of the Sector Highfield, Vancouver, and his wife, Mrs. A. J. Palasz, and congratulated him on his success in winning the King's prize at the recent meet of the National Rifle Association at Bisley.

The name of Wm. Barks of Moncton, president of the Canadian Chamber of Commerce, has been added to the list of those who will represent Canada at the Kyoto, Japan, conference of the Institute of Pacific Relations, the conference to be held in October.

The London Daily News says that it learns that the Royal family is somewhat anxious about the health of Prince George, youngest son of the King. The Prince left the navy because of his health and entered the Foreign Office. This was said to be caused by his present indisposition.

The Canadian boy scouts at the international jamboree were extremely well pleased at a gift of a totem pole from Lord Baden-Powell. The carving on the totem pole represents a red Indian and a beaver together, with a snake intertwining the pole. On the rear are the words "Friendship Jamboree, 1929, R.E.P."

Could Do Better

A small car collided with a motor-lorry, and as it was clearly the fault of the car driver, he said: "Well, all I can say is that I am sorry." "You said the lorry driver," is what all can say?"

"Yes."

"Well, then, you just listen to me!"

It is said that the newspapers of the United States and Canada usually use stiff paper to glide the world with a stamp 5 miles wide.

The paper made in one year would make a path a mile wide all the around the world.

It is the business of a business man to see that his employees attend to his business.

"Why are you crying?"
"My sister has measles and I can't go to school."

"But that is not very bad."

"But doctor says she will be better tomorrow?"—Lustige, Blaetter, Berlin.

Guards Against Gas Explosion

New Invention Works Danger Signal and Fans Away Fire

After the most recent gas explosion which has occurred recently in London, it was only to be expected that something would be invented to make this possibility of explosion a thing of the past. The most recent news of a little device which does away with any danger of gas escape.

This wonderful little invention is not very impressive to look at, being just a little cylinder shaped, instrument containing a fan which can be set, which can be fitted wherever there is a possibility of leaking. But it only needs the very minutest escape to set this gallant little sentinel in action, when it works a danger signal, gets in touch with the nearest telephone exchange, and informs those in the power of the exact locality of the escape.

Not content with this warning, the trustworthy little cylinder sets in, and turns on an electric fan to keep away the fumes.

What more could one ask?

Edison Competition

Boy Selected From Washington State to Represent Canada at Footsteps of Inventor

Willard B. Huston, a youth from Elgin, Madison, Wis., was named the winner of the Thomas A. Edison competition for choice of a protege and follower in the footsteps of the inventor.

The forty-year-old contestants of the state and the market of the Hudson Bay Railway has come from the Indians at York Factory. During a recent two days "talk" of the council, which is held annually after treaty payments, the paymeny was made to the Indians to stop "these people" building a railway to Churchill, because it will affect the trade in the York Factory region.

The request was made with all solemnity, and the paying agent was up against quite a problem, according to the version of the affair which has reached The Press. However, the agent told his red friends that they must not be afraid.

Churchill turned up for their sake, at the same time assuring them that the government would not allow them to starve on account of their request.

The Indians accepted the agent's promise that he would do all he could for them, but they are far from being pacified about the Bay railway.

The York Factory Indians are the ones that will be living at Churchill will write foxes from coming further down the coast and thereby the chief standby of their fur trade will be cut off.

The protest of the Factory Indians has caused discussion in the north and has again raised the problem of further aid to the Indians in times of stress.

The fur catch has been high all over Manitoba in the past few days, and several of the Indian tribes have been in distressing circumstances.

J. M. R. FAIRBAIRN
Chief Engineer, Canadian Pacific Railway, who has been chosen to represent Canada at the World Power Conference to be held at Tokyo, Japan, next Fall.

Over eighty thousand Agency.

Saved His Pennies

Man Has Nine Bars With \$38,500

John Jacobs, a garage owner, staggered into an automobile agency at Bloomfield, N.J., under a burden of nine heavy bags and demanded delivery of a Ford automobile he had ordered.

The dealer looked questioningly at the nine bags which James heaved up on the counter with a sigh of relief.

"There are \$38,500 pennies in those bags," Jacobs said in explanation, and if you don't believe me, count them, I've been saving those pennies for four years and I said if I ever got enough of them together I'd buy one of your cars."

There were \$38,500 pennies in the bags, so Jacobs drove away in the car.

Recipes For This Week

(By Betty Barclay)

SHEPHERD'S PIE

On a well-buttered pie plate, pour a well-beaten pie crust. Next, fill the crust with milk to right consistency, cut left-over meat or fish into small pieces, combine with equal amount of medium cream sauce (2 cups milk, 4 tablespoons butter, 1 teaspoon salt, 1/2 cup flour, 1/2 cup milk with enough gravy, mix with milk to make right consistency. Add 2 cups left-over meat or fish. Onion, green pepper, and mushrooms added for better flavor. Pour around the meat. Bake in a moderate oven until well browned. Garnish with parsley. If desired, the dish may be lined with potato and filled with creamed mixture.

An economy dish is one in which left-overs are used, or may be prepared with inexpensive ingredients. Try the following. Even though you be wealthy, you will appreciate the flavor:

POPPY RISOTTO

6 cups whole milk.

1/2 cup rice.

1/2 cup sugar.

1 teaspoon salt.

1/2 teaspoon nutmeg.

1/2 cup butter.

1/2 cup poppy seed.

1/2 cup cream.

1/2 cup mushrooms.

1/2 cup onions.

1/2 cup green beans.

1/2 cup carrots.

1/2 cup turnips.

1/2 cup parsnips.

1/2 cup leeks.

1/2 cup onions.

1/2 cup mushrooms.

1/2 cup onions.</p

BRITAIN TAKES A FIRM STAND ON REPARATIONS

The Hague.—Doubtless again seems to threaten the vexed question of reparations. Great Britain is firm in her opposition to the Young's plan evolved at the recent conference of experts in Paris, and France, Italy, and Belgium seem equally determined to oppose any change in the scheme.

Right Hon. Philip Snowden, chancellor of the exchequer, outlined the British position and said his country had sacrificed its own interests to the most liberal extent in order to further the cause of peace. In his statement before the financial committee of the 1929 conference of The Hague, gathered to consider the Young plan,

What stopped the other delegates would not regard it as offensive. Mr. Snowden said no reply whatever has been given to any of his arguments and none of his figures had been challenged.

The British Government, he said, did not share the view that the plan was indefensible. If that were so there would be no need for a conference. Great Britain, he declared, would not accept the shares in the reparations that would be given to the committee of experts, she would not consent to the diversion of annuities into conditional and unconditional parts, and thirdly would not approve of continued deliveries in kind.

Mr. Snowden did not consider it a sacrifice on the part of France to give up something that she would never have received. If sacrifices were to be talked about, he would have something to say about Great Britain's interests.

No single country had made anything approaching the sacrifices made by Great Britain, he continued, but the British had never complained. Great Britain had not been asked to sacrifice any of her material interests but had been endangered but to support treaty rights in defense of world security. She willingly did that, willingly sacrificed her blood and her life.

No country had been left with Great Britain's war debt which now amounted to \$27,500,000,000 or more than double that of any other nation in the war. Excluding the debt to the United States, Great Britain's war debt was \$23,500,000,000. At the end of the war the Allies owned Great Britain \$10,000,000,000, of which France owned \$3,000,000,000 and Great Britain claimed only \$135,000,000. It is true that Italy now owes \$23,500,000,000 and Great Britain only claimed \$300,000,000, but the Young plan reduced this to \$200,000,000.

The British taxpayer would be burdened for the next sixty years with the interest of \$100,000,000 or more. The Young committee, Mr. Snowden argued, had no right to interfere with the Spa percentages.

Mr. Snowden contended the payment of reparations would be greatly affected by Germany's export trade disadvantageously.

He emphasized his stand that the British delegation must have a decision on the points raised before the committee could go further or discuss any other matters.

"I have behind me the unanimous support of my government," he added, "and of the House of Commons irrespective of party, and, I believe, of the whole of Great Britain. We speak truly frank and fearless. We say we cannot compromise on the matter. The House of Commons would never ratify the Young report in its present form."

Railroad May Be Sold

British Columbia Likely To Get Bid Of Pacific Great Eastern

Victoria, B.C.—The Pacific Great Eastern may be forced to withdraw from the people of this province within a very short time. Hon. R. P. Pooley, attorney-general said, speaking at the Esquimalt Conservative picnic in Saanichton.

The Pacific Great Eastern, owned by the Government of British Columbia, A survey of the line and its territory is now being made jointly by the province, the Canadian National and Canadian Pacific Railways.

Negotiations Break Down

Tokyo.—Japanese dispatches from Manchuria, Manchuria, where representatives of Russia and China have been discussing the situation arising from Chinese seizure of the Chinese Eastern Railway, reported that the negotiations had broken down.

British Airship May Be Zeppelin's Rival

Hope Machines Nearing Completion Will Be Much Faster

London, Eng.—Gabriel Voisin's famous "Giant" Zeppelin, the first successful trip to America probably would be followed with establishment of a regular trans-Atlantic air line brought considerable speculation in London regarding plans as to the possible future of British commerce.

Greater speed or at least a cut in elapsed time of the trips was held to be a necessity for success of such a line and the hope was expressed that two British lines now nearing completion, the R-100 and R-101 would prove much faster.

Sir Dennis Burney, M.P., head of the company which built the R-100, in a talk with the Daily News opined that the Graf's time did not give him much time to get to America and an airship to be successful must be able to do a trip in sixty hours outward and 48 returning. This would imply a cruising speed of 90 miles an hour.

Resignation Of Grain Board

New Members Will Be Appointed At All Early Dates

Ottawa.—All the members of the Board of Grain Commissioners for Canada have resigned, their resignations to take effect August 15. On that date the names of the new commissioners will be given out.

According to the resignation of the members of the grain commission was made by Hon. James Malcom, Minister of Trade and Commerce, at the close of a cabinet sitting here.

Malcolm said that the new commission would make its own selections for the posts of assistant commissioners after it was appointed.

The resigning members of the commission are Chief Commissioner L. H. Boyd, K.C., and Commissioners Matthew Snow and James Robson.

The new board will also consist of three commissioners, but four assistant commissioners will also be appointed.

New Administration Has Assumed Office

Take Oath Before Premier S. F. Tomlin At Victoria

Victoria.—Right Hon. Francis Alexander Argyle, P.C., Chief Justice of the Dominion of Canada when he took oath of office in the office of Premier S. F. Tomlin, of British Columbia here. Following the investiture, His Excellency issued a royal warrant confirming his appointment as administrator of the Dominion. A second proclamation appointed Hon. Mr. Justice P. B. Mignall, of Montreal, as deputy administrator, invested with authority to sign documents of urgent character.

Eight Killed In Riots

Jute Mill Strikers In Calcutta Clash With Police

London, Eng.—Calcutta dispatches to the Daily Mail said eight persons were killed and 20 injured in a fight between jute mill strikers and police and a police station, 240 miles from Calcutta. The strike has been on for several weeks in the area after workers protested introduction of the 60-hour week.

Forty per cent. of the loans in the Calcutta area are stopped, and about 12,000 workers made idle.

Railroad Ship Returning

British Columbia Likely To Get Bid Of Pacific Great Eastern

Victoria, B.C.—The Pacific Great Eastern may be forced to withdraw from the people of this province within a very short time. Hon. R. P. Pooley, attorney-general said, speaking at the Esquimalt Conservative picnic in Saanichton.

The Pacific Great Eastern, owned by the Government of British Columbia, A survey of the line and its territory is now being made jointly by the province, the Canadian National and Canadian Pacific Railways.

Drops Freedom Of Seas Issue

Toronto.—A special dispatch to the Mail and Empire from Washington says that the Canadian who dropped the freedom of the seas issue out of his disarmament program, not only on the theory that it does not jibe with the Kellogg anti-war treaty, but because he believes naval parity with Great Britain is the only real guarantee of freedom of the seas.

British Atlantic Fleet

New Becomes the Greatest Single Fighting Force in the World

London, Eng.—Gabriel Voisin's famous "Giant" Zeppelin, the first successful trip to America probably would be followed with establishment of a regular trans-Atlantic air line brought considerable speculation in London regarding plans as to the possible future of British commerce.
